Production Management Template for Biz]® launched Low-cost, easy-to-install production control system for fables manufacturing

Focus Systems Corporation
NTT Data Biz Integral Corporation

Focus Systems Corporation (based in Shinagawa, Tokyo; President Keiichi Mori) and NTT Data Biz Integral Corporation (based in Minato, Tokyo; President Koji Tanaka) are proud to announce the launch of Production Management Template for Biz], a jointly developed production control optimization and streamlining system designed primarily for fables^{*1} manufacturing operations.

Production Management Template for Biz] is based on the Biz] ERP system^{*2}. It provides a low-cost streamlining and integrated management solution for Biz] module^{*3} data. The system is quick and easy to install and fully equipped with a range of industry-specific functions and features designed to minimize add-on development.

Background

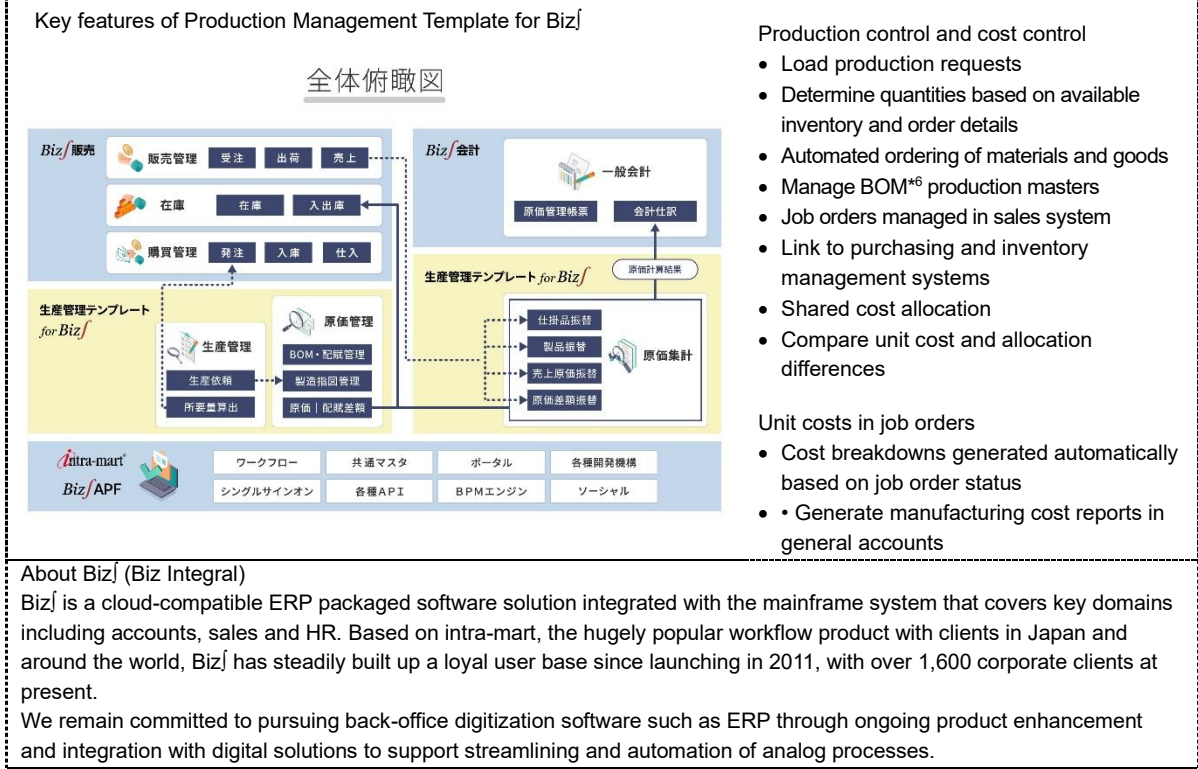

The fables manufacturing sector is experiencing issues around burgeoning data workloads and incompatible formats, due to the number of companies that still manage production data on programs like Excel or on dedicated systems that run independently of the main backbone system.

Production Management Template for Biz] is the result of a joint development project by Focus Systems and NTT Data Biz Integral to address these issues, utilizing the combined experience and expertise of the two companies in the field of fables manufacturing.

Overview of Production Management Template for Biz]

Production Management Template for Biz] uses the common masters^{*4} and components from the Biz] sales and accounting modules, and provides additional functionality to support unification of masters and integration with transaction data^{*5} from multiple modules.

Once a production request has been loaded, Production Management Template for Biz] automatically generates a job order linked to stock completion and stock ordering processes. For companies that still use Excel or separate production management systems independently of the main backbone system, this eliminates the need for duplicate data entry and data compatibility checking, effectively reducing workloads by an estimated 20% - 30%.

Delineation of roles

- Focus Systems: Development of Production Management Template for Biz[product; sales, servicing, presales and installation of Biz[and Production Management Template for Biz[products
- NTT Data Biz Integral: Promoting Production Management Template for Biz[product; sales, servicing and partner support for Biz[products

Future outlook

Focus Systems and NTT Data Biz Integral are looking to scale up this business domain at pace by assisting fabless manufacturers in embracing digital processes and administrative improvements and building an ever-expanding Biz[-based ecosystem*7 that breaks down barriers between companies, through marketing and promotion of the Production Management Template for Biz[that is tailored specifically to the fabless manufacturing sector.

【About Focus Systems】

Established 1977. Focus Systems Corporation is involved with the development and operation of systems in highly social areas such as the public sector, communications, and also actively promotes business development predicated on the trends of the times such as IoT, Cloud and AI. Our corporate slogan is “Put Our Heart into Technologies.” Connecting individuals through technology, each one of us here at Focus Systems works with passion and sincerity.
